

“Houston, we have a problem”

Ian Anderson - Enterprise Architect at Ellucian, compares how an Apollo 13 moment was playing out across the global higher education sector just a few months ago. Similar to the NASA staffers in the film, a collection of business processes, IT applications, technology components and so on were metaphorically thrown onto the table with the instruction, ‘Make teaching and learning virtual’.

With the ongoing challenges and continuing disruption, Ian emphasises why it has never been more important to identify and deliver business capabilities that support your institution in more agile ways.

Is it time to reassess your institution’s priorities?

As the post-COVID-19 operational environment forces many to re-evaluate their positions, it has never been more important to identify and deliver business capabilities that support your institution in more agile ways.

In this [webinar](#), listen to Ellucian’s Digital Transformation team discuss the operational “backbone” to support agile business capabilities, and how the adoption of a digital transformation framework helps to underpin change.
